### Integrated Solutions

Business
Form Builder

The Easiest Way to Build Powerful Business Forms in Quickbase in minutes with no code. The combination of Quickbase + The Form Engine is now the most advanced form and workflow platform on the market!

All the features of our Business Form Digitizer with a full no-code html editor. Dynamic forms expand or collapse to adapt to the data in them. Create online forms by importing a master from Word or other software, pasting from websites or images, or building from our blank canvas html editor. Perfect for all forms and documents that need data-driven sizing and embedded reports.

- **Data and generated pdfs flow seamlessly between your business forms and Quickbase, because your business forms are now your Quickbase forms for Adding, Editing and Output, all-in-one.**

- **Digitize manual, legacy forms and automate agreement workflow, with employees, customers, vendors, with no additional licenses or user training required.**

- **Eliminate disconnected business agreement processes in paper, emailed pdfs, 3rd party e-sign products to speed up the business.**

- **Improve customer service with easier form completion and quicker transaction processing.**

- **Stop manually entering data. Start capturing data automatically at its source with data validation.**

- **Built-in e-signatures eliminate added cost of DocuSign.**

- **Every digitized form is mobile enabled with QR codes, geo-location, SMS/Text. Execute with e-signatures.**

- **Easily added to your Quickbase subscription.**

TURN THIS
INTO THIS

Use Cases:

- **Maximum flexibility to create highly formatted, responsive, data-populated forms and documents: Invoices, Order forms, Timesheets, Expense Reports, anything with varying content or line items.**

- **Create daily progress reports using any Word or PowerPoint template. Quickbase fields, reports added anywhere. Data blocks automatically expand to include one or many lines of text, any number of photos, all signatures. Custom formatting to get the right look: labels, column width, colors, font, borders and much more. Reports can be auto generated and routed for approval with e-signatures. Flexibility unavailable in Quickbase itself.**
